HOW TO PASS A HOME INSPECTION

CLASS TOPICS

- **Ethics Of Home Inspections**

The rules and legalities a home inspector must abide by and what is or is not ethical to ask of a home inspector.

- **What Is Checked During A Property Inspection**

The course is primarily centered around six areas of interest. HVAC, Electrical, Roof, Exterior, Interior, and Plumbing

- **Commonly Found Problems**

Commonly missed and neglected maintenance items that are found during inspections. Identify hazardous materials like asbestos, lead, mold, and destructive pests.

- **Property Maintenance**

A significant focus of the course is to educate on the areas of a home that need regular maintenance and best practices to promote the longevity of the house and its internal systems.

- **The class can be taught in your conference room or a similar space.**
- **Virtual attendance is not allowed.**
- **The fee varies depending on the number of attendees.**
- **The instructor provides handouts on the day of the class.**
- **This is an interactive course, meaning participation is expected**
